VOL. LVI, NO. 19, UNIVERSITY OF ALBERTA

FRIDAY, DECEMBER 3, 1965, EIGHT PAGES

—Stacy photo.

AN ATTEMPT TO INSTRUCT—SUPA member Jim Johnson, sei 4, mans the controversial Vietnam booth in the math-physics building. A special meeting of SUPA Tuesday night saw the group agree to a withdrawal of the booth to allow further negotiations with the administration.

Inter-residence raid quelled by Fort Garry constabulary

WINNIPEG (CUP)—Fort Garry police were called to the campus last week to break up an inter-residence raid some 150 Tache Hall students were staging at University College.

The action started about 11 p.m. when 150 Tache students stormed across the parking lot, and on to

the front steps of University College. The University College students had advance warning of the raid, and were waiting quietly on their balconies with waste paper baskets and garbage bags full of water.

Damage to a large number of Tache students were on the steps; the baskets were emptied on to them. The attack momentarily deterred the students, but they still managed to get access to the building. Cans of spray paint were used to paint signs on the windows and walls of the building.

The Tache students entered the dining hall, overturning chair, scattering tables, and spilling enamel paint on the floor.

Meanwhile, others of the Tache mob were trying to forcibly gain entrance into the residence area, and attempted to break the lock on the main double doors before attempting to destroy the grating inside the door. Neither venture was successful.

Finally, the University College students got out a fire hose on the second floor, took it out on the balcony, and turned it on the Tache students.

This seemed to dash their spirits somewhat. A few more people tried to drag one or two of them in to throw them in the bathtubs.

After a brief struggle, the Tache students were pushed out of the area, and the doors closed. A few minutes later, the Fort Garry police arrived.

Damage estimated to University College as a result of the raid was not more than \$100, since many of the University College students helped clean the place after the raid.

Bulletin

DIE chairman defies provost

A student summoned to appear before the student court has been advised to ignore the charge by university provost A. A. Ryan.

The discipline, interpretation and enforcement board of students' discipline will meet with the chairman of the Board of Governors Wednesday.

The hearing of this name is being withheld, is charged with acting against the principles of good conduct and the best interests of the university body as a whole.

The five-member board will meet Tuesday to rule on the case.

The hearing is in room 236 of the eng building at 7 p.m.

Vietnam kits back in SUB

Investigation to proceed on campus soliciting ban

A Vietnam information booth established as a battle line between a U of A peace group and the administration has been withdrawn to allow for further negotiation.

The Student Union for Peace Action erected a booth in the math-physics building in defiance of a university regulation forbidding "soliciting and canvassing" on university property.

SUPA will operate its booth in SUB until the rules denying the right to operate their literature booth are fully investigated and interpreted.

Following lengthy discussion at a Tuesday meeting the group reached a consensus and agreed to use existing channels to obtain permission for their venture.

The Tuesday meeting was called after discussions were held earlier in the day between university provost Prof. A. A. Ryan and SUPA representative Jim Brothroyd.

Brothroyd, a grad student in sociology, met Prof. Ryan as a spokesman for SUPA, which has been selling "Vietnam kits" containing information and comment on the Vietnam war.

He said he was told to examine his position at this university before considering any further action on the matter. The Vietnam kit, which has now been in operation for three weeks in the students' union building and in the math-physics building, is run by students. The former Toronto student said he has signed an agreement on the university entrance in which he promises to abide by university rules.

The three-hour meeting Tuesday night was presided over by Prof. Ryan, and was directed mainly to the members of the Board of Governors. Prof. Ryan who would have to consult other SUPA members before committing them to any particular course of action.

SUPA members asked Prof. Ryan to represent the administration's position at their meeting, and outlined what was expected of them.

After the meeting, the provost and the members of the Board of Governors approved the decision of the Dean's Council turned down the original request for space because SUPA wanted to operate it for an extended period of time and did not clearly specify the booth's location.

He outlined two problems the booth would create:

• It would already seek permission to erect a booth opposite the 'Viet' booth and this would create traffic problems in the building.

• "Unruly groups" might establish themselves on campus if the administration did not enforce the Board of Governor's rule concerning soliciting and canvassing on the campus.

Prof. Ryan suggested the group re-examine its stand on the controversy, and said the university would be an "inconveniences" until the group goes through proper channels to have it considered by the correct administrative body.

The students met with strenuous objections from some SUPA members, who charged the administration's action constituted suppression of free speech.

Council kicks off fee battle

Students' council began "action to prevent increases in residence rates and tuition fees" at Monday's meeting of students' council.

Richard Price, students' union president, presented a report pointing to increases in residence rents and tuition fees as "more serious potential threats" which students' council will have to deal with soon.

Students' council accepted the recommendations of the report and referred it to the education action committee.

Price says there is every reason to believe the university and the government will turn to a tuition fee increase to meet rising university costs.

"I have every reason to believe that as the cost of running this university increases, the Board of Governors will turn to the students to bear an increased share of the burden," Price said in his brief to council.

Price recommended a definite program to study and prepare the students for confrontation on the issue of increased tuition fees.

He cited the following course of action:

- Undertake a "lobby" with the Board of Governors and the Provincial Students Assistance Board to make them aware of the economic strains on students.

- Press for a student representative on the university board committee to allow greater student involvement in the problems of financing higher education.

- May offer a plan of action setting down demands, values and goals.

- Continue the present students' union support for the CUS goal of "university accessibility" to post secondary educational opportunities.

- Press the question of tuition fees to the Education Action Committee of the council.

- Refer the question of residence rents to the residence students' association.

"If we are to have some assurance of the strength of our position we must create an awareness of the issues among the students and public," Price says in the brief.

The most important questions you could ask about a career with IBM ...answered here

Last year's graduates said that the four most important considerations to them in evaluating companies where they might start their careers were challenging work, advancement opportunities, educational opportunities, and the use of ingenuity on the job.

Here is how IBM rates on these four critical factors:

Is there an opportunity to do challenging, exciting work at IBM?

There is naturally a greater sense of participation and involvement when the field you work in is as young, vigorous and growing as data processing. IBM is at the centre of what has been called an industry without bounds. Here you will find the diversity and continuing challenge of a pioneering industry. IBM machines are assisting in atomic research for industry, in space exploration, in the compilation of Olympic Games results. They are helping where steel is produced, where ships are built, where oil wells are drilled. They are at work in transportation, in agriculture, in real estate, in medicine, in education, in advertising, in construction, in banking, in manufacturing, in government. The climate for innovation, new ideas, and for talented new people is unusually good. Challenges abound. Knowledgeable people with a broad range of talents and abilities are needed, and IBM takes special pains to keep you from being cornered in confining or restricting jobs. The company finds it good business to help you—and every other employee—to discover *everything* you can do. The excitement of working where you can actually see the future emerging is here. Whatever your chosen area in this field, IBM can offer you a broad spectrum of stimulating activities.

Are there real opportunities for advancement at IBM?

A person entering IBM now is still on the ground floor with respect to the growth potential of the data processing field. There is room for steady advancement. It's up to you, but everything possible is done to help. The company has been built on the proposition that we constantly improve our products and our technology while providing a maximum degree of satisfaction on the part of our employees in their assigned tasks. IBM has a reputation to maintain and only by moving promising new people along can the company fulfill its own promise for the future. The individual's quest for opportunity is welcomed and encouraged. Bigger jobs await those ready to take on bigger responsibilities. Promotion from within—is traditional IBM practice. Many of IBM's more important positions are held today by people in their thirties and forties who have steadily moved ahead from their first job with the company. For those who seek a real sense of job satisfaction, an IBM career presents stimulating intellectual and material rewards.

What about educational opportunities?

The real assets of IBM lie in the potential of its people. IBM considers your university background only a beginning, just as you do. As you feel the need to review, up-date and advance your education, IBM provides a wealth of opportunities at every stage of your career. Here, education is a continuing process. In fact, each year IBM as a company spends more on education than do all but a handful of the world's largest universities, and there are a number of voluntary programs in which employees may participate with

company financial support. At IBM, progress is the result of human inventiveness, talent and skill. Through extensive education, training and management development programs, you are aided in preparing yourself to move ahead, by acquiring a well-rounded business background and making yourself eligible for many kinds of professional as well as management positions.

Is ingenuity important at IBM?

Today there is scarcely a form of human activity in which data processing cannot play some useful part. IBM's rate of growth has created many opportunities for young people with outstanding initiative, imagination and competence. Because of the continuing need to expand and move ahead, you will find a remarkable readiness to accept change. You will find that your ideas count from the first day you come to work. And whether working independently or as part of a team, you will have IBM's resources to draw upon for technical and administrative assistance.

At IBM there are a remarkable variety of starting points and paths to advancement. You start with the assurance that a satisfying and rewarding career is available to you in a dynamic, thriving industry. Make it a point to discuss what IBM's "room for achievement" could mean to you with the IBM representative who will be visiting the campus

DECEMBER 8, 9, 10

Your placement officer can make an appointment with our interviewer. If you cannot attend the interviews, write or visit the IBM office in Edmonton at 10012-107th Street.

IBM

International Business Machines Company Limited

Ban on African goods refused

By LORRAINE MINICH

A motion to oppose the sale of Rhodesian and South African goods at Treasury Van was defeated at Monday's council meeting.

The motion was defeated after a long and heated debate in response to a suggestion by Rich Price, students' union president, that council adopt some policy towards apartheid.

Bill Monkman, eng rep, said South African internal affairs showed in no way concern students' opinion.

Monkman's statement brought opposition from other council members.

"The purpose of this council is to represent student opinion," said Bruce Olsen, CUS chairman. "The

students aren't concerned, and they should be. We can't ignore the political aspect."

Treasury Van supporter said sales from stores of Rhodesian and South African goods would be returned to the native Negro.

Mike Stewart, ag rep said, "If the Negro can't get a salary job, let's not support his cottage industry by demanding that the few cents he gets from his crafts."

"If we ban these goods," said Gardner, "students will flock over to Treasury Van to buy more of their goods. Thus WUS benefits and the students will benefit if work WUS is doing in Africa."

The discussion brought comment and participation from most of the council members.

Jim Miller, phiem rep, told council he had just found out he is a BMOC (big man on campus).

Council accepted a suggestion by Omaya al Karmy to hold a dance in conjunction with the White Gift Party. Admission to the dance will be for an orphan. A computer method of selecting dates for the dance was suggested by Fraser Smith, co-ordinator of student activities, and approved by council.

Council voted to support financially a survey aimed at evaluating student attitudes toward their education.

The results of this survey were presented by Dr. R. M. Pike of the sociology department and Omaya al Karmy, academic relations committee chairman.

The rumoured tuition fee increase will be submitted to the Education Action Committee for investigation.

The detection device above the ashtray was activated by smoke from the burning paper in the tray.

Normally the device, working on the principle of ionized particles will not react to a small amount of smoke but in this case the small fire was too close.

Mr. Saunter says the incident was probably accidental. He says he has been in touch with one of the faculty of education to discuss the breakdown of the safety organizational system causing the alarm to go unheeded by students and staff.

THIS WEEKEND

UNIVERSITY WOMEN'S CLUB

The University Women's Club of Edmonton Christmas Tree (Festivals International) will be held Saturday from 1 to 4 p.m. in Webster Lounge. Festivals International will be presented by students from Burma, India, Pakistan, Malawi and Uganda.

UNIVERSITY PARISH

The university parish will hold an Advent Service of Lights Sun-

day at 7 p.m. in Garneau United Church at 112 St. and 84 Ave.

PROGRESSIVE CONSERVATIVE CLUB

A policy discussion meeting will be held Sunday at 1 p.m. in Gold Key room, SUB. Everyone welcome.

CHRISTMAS CONCERT

The university's annual Christmas concert will be held Sunday in Con Hall at 3 p.m. Admission free.

MONDAY CONCERT PREVIEWS

Evening concert preview with Brian Prismann and a panel, Faculty Club, Monday at 7:30 p.m. Coffee will be served. Students enjoy. Morning concert preview with Brian Prismann and Tom Rolston, Molson's Edmonton House, 10 a.m., Dec. 10. Coffee will be served.

INTRAMURAL SWIM MEET

Entry deadline for the swim meet Dec. 11 is Monday at 1 p.m. Individual, relay and diving events. Sign up with your team manager.

TUESDAY STUDENT WIVES' CLUB

The Student Wives' club will hold a combined general monthly meeting and Christmas party Tuesday at 8 p.m. in Waunaella Lounge.

SOCIAL CREDIT

The U of A Social Credit club will hold a meeting in sm. 2017, the med sciences bldg., Tuesday, at 7:30 p.m. Meeting will include reports on provincial and national conventions including a report on the new Canadian Student Social Credit Confederation. It will also

ISIS offers summer jobs to qualified students

As well, ISIS arranges health and accident insurance, secures foreign work permits, and makes on-the-job spot checks to check conditions as well as employee-employer relationships.

When warranted, ISIS will reassign students to other jobs.

While most available jobs are in Britain, ISIS has found a few students willing to pay higher transportation costs to get jobs in more distant parts of the world.

Any interested students should contact Prof. Paul Robberecht in rm. 205 of the south lab as soon as possible.

U of A cowboys tops in Alberta college rodeo

U of A rodeo team is the best group of college cowboys in Alberta.

The team came out on top in a college rodeo sponsored by the UAC rodeo team, held at Royal Burrows Ranch Nov. 20.

Trot Towers of U of A took first place in saddle bronc riding; team mate Dale Geiger won bareback broncs. Doug Milligan and Don Stewart, both from the Edmonton campus, took the top two places in calf roping, and Martin Smith came second in tie-down roping.

Teams were entered from U of A, UAC, Olds Agricultural and Vocational College, and SAIT. Trot, Winston Brown, saddle bronc rider; Winston Brown, tie-down roping champion Lorne Wells, and other professional rodeo cowboys attended the rodeo.

include discussion of policies for the forthcoming Model Parliament campaign.

WEDNESDAY

ENGLISH COUNCIL

The next English Council meeting including discussion and discussion will be held at 7 p.m. Wednesday in rm. 170, ed bldg.

RUSSIAN CLUB

Don't miss a talk by Professor L. E. Gadz, associate dean of engineering, on Russian humor, with color slides of cartoons from Soviet humor magazines, Wednesday noon in biology 242. *

BOOKSTORE

U of A bookstore will no longer be open Saturday morning, because of a lack of patronage.

FLYING CLUB

The U of A flying club meets Wednesday at 8 p.m. in phys ed 124. A meeting will be held at 7 p.m. for a tour of the facilities of Namao AFB will be announced. Everyone welcome.

STUDENT AWARDS

One scholarship will be available for a U of A student to attend the Swiss Federal Institute of Technology at Zurich for ten months beginning in August. The fields of study are chemistry, geology, agriculture, mathematics and physics, civil engineering, mechanical engineering, electrical engineering and philosophy. Lectures will be given in German. The award will cover tuition fees and normal living expenses. Travel and incidental are at the student's expense. Apply to the administrator of student awards by Feb. 1.

IN YOUR THOUGHTS...

you imagine yourself using Tampax internal menstrual protection, feeling clean, fresh, reassured, serene, confident. You know that many other girls your age use it. You know that many mothers are telling their daughters about it. You have heard that it was invented by a doctor for the benefit of all women, married or single, active or not. Couldn't this be the month you leave the belt-pin-pad harness for keeps? You'll be glad you did.

comment: that ugeq editorial

UGEQ editorial

To The Editor:

Your editorial of Friday, Nov. 26 was not very useful in clarifying the issues of UGEQ and the English-speaking universities in Quebec.

I would not claim to speak for the UGEQ, but I think that at least would want to point out the following:

In a typical English-Canadian arrogant form you disparage the idea of a bilingual Quebec or of a unilingual Quebec student union, (in the sense of there being one official language). Neglecting the fact that all the other 9 provinces are unilingual despite their having French-speaking minorities of various size, Quebec's willfully continuing support of English universities, but it wants its French status clear.

You seem concerned that the Canadian Union of Students has lost its status as a genuinely national student organization. There are two foundations "to us": (1) the French meaning of the work—or if you like, in Lord Durham's sense) in Canada. As far as I am concerned English-speaking universities, CUS, now a truly national student organization, UGEQ, representing the French-speaking universities is a truly national student organization also. This fits the English-speaking universities in Quebec in a difficult position. The BNA act allocates the responsibility for education to the provinces. This requires the Quebec government to cater for French minorities in the English-speaking provinces, and now for the English-speaking minority in Quebec, the state of the French-speaking universities must turn to mention these economic-political interests as a reason for the English universities' desire to join UGEQ; they're interested in more than that.

3. A statement like, "UGEQ's policies are extreme to say the least," is understandable in a typical city paper like the Journal, BUT is it understandable in a paper like the "Examiner" in relation to what? Is it "extreme" to offer a refuge for young Americans who wish to work for an end to the war in Vietnam, to help the Vietnamese people, and who if remaining in the United States have the choices of being trained for minor as well as a professional killer in the war they can consider themselves to be homosexual or concordant or "religious," or spending five years in prison.

As a footnote here—it is easier to understand UGEQ's tentativeness in this regard, since it can draft in the light of Quebec's traditional resentment of conscription laws.

And apparently, developing "close bonds with labour organizations" is extreme too. I gather it's less extreme for students to retreat into a \$6 million student union building; that's enough to more than double the size of the largest dormitory in the third of the Indian families who earn less than \$1,000 a year or to support 1,500 field workers in student government development projects, or give 1,500 complete scholarships to students who otherwise wouldn't be able to attend school. Maybe we could use a little "extremism" ourselves.

4. In order to maintain its distinct identity, UGEQ has made the not

unreasonable demand that its members unions have no other affiliations. This is not so strange a condition for our organization, to make that reasonable to be concerned about allegiances of its members.

5. I think you are a little behind the times. In this particular publication about UGEQ, my information has such as the separation of the French-speaking students from the English-speaking students, that the separation is less central a concern of Quebec students than it has been, that the greater concern is for matters of social justice and the clear position of the French in Quebec.

6. You plead for dialogue. There can be a point, Mr. Editor, where a plea for dialogue is a plea for staying off change that certain groups may justifiably want. Most American Negroes can tell you that, Canadian Indians can too, to point that out to you in the next few years. Dialogues commence once each others' rights are recognized and there is mutual respect. After carrying on a few pleads and half-hearted editorials, it will probably be difficult for the Gateway to create such dialogue. And, incidentally what language did you have in mind?

There are a number of things

about the Quebec student groups that I find difficult to comprehend and some matters like their tendency to talk in international terms that I fundamentally disagree with in principle. But I cannot self-righteously urge them "moderation" given the inequality of the French-English partnership that has been this country's history. I only hope to help create a better understanding of French grievances in English Canada. And may God grant we learn from them a little of what student responsibility means.

Peter Boothroyd
grad student

Toward a fuller nation

To The Editor:

I was shocked by the attitudes displayed by the editor of the *Gateway* on November 26 in the editorial "Toward a Fuller Nation." He is talking in 1965 (almost 1966) the way English-speaking Quebec students stopped talking two years ago. I would like to present some comments on certain specific statements he has made. In case my name suggests

generous loans and swedish students pay no fees

This article is reprinted from the *Chronicle*, the student newspaper from the university of Waterloo.

by dove campbell

Our governments for the past God-knows-how-many terms have promised minimum student aid, yet fees and residence costs have been continually rising.

Before we resign ourselves to the raw deal we're getting financially, let's take a look at a government commitment for higher education: constituting the plight of the Canadian student with that of his Swedish counterpart.

By comparison with the \$555 minimum university fees we pay now, the same Swedish student pays nothing.

No Fees
Universities are built and maintained by the state. Professors' salaries are also paid by the government.

Student residences are erected and maintained by the state, with administration as the only expense. By the Academic Frörening (a sort of student council), which builds these residences aided by government construction loans with repayment conditions very favorable to the students.

Student residences are cheaper than outside accommodation. A room in a student home, in which the rooms are fully furnished, is considerably larger than those in Waterloo student village, costs about 150 kronor per month (about \$30). Full kitchens, all utilities included, but food is the student's responsibility. This compares with about 200 kr. for a room rented in a private house.

But government aid to students

goes considerably farther than this, for the Swedish university student is considered an adult, capable of financially supporting himself. Government measures are geared to this concept of helping him get his education independent of his parents' resources.

Even students receive from the government a living allowance of 175 kr. per month for the eight months of the academic year. This is now—reversible. As you see by comparison with the cost of accommodation, this living allowance is equivalent to free housing. This allowance is continued as long as the student continues to pass his examinations of a reasonably high standard.

This allows the student only his books, food and entertainment to pay himself. If his personal income is not sufficient, he may borrow, complete his financial interest, up to 7,000 kr. annually. This generous loan need not be paid back until the person is 50 years old.

Recently, there has been a stipulation placed on the availability of the loan. The income of the student's parents must not exceed 30,000 kr. This ruling is unpopular among students for its negation to a certain extent of the student's financial independence from his parents. But as this income is one not easily reached in Sweden, the regulation does not apply to most.

In a different loan for the student? Does he value his education so little that he doesn't have to work to obtain it?

I think that slackness can set in because of the ease of financing a university education financially to a very slight degree. It must be noted, however, that the student loses his living allowance if he fails to pass his exams at a stipulated rate.

News item: Council slashes SUB costs . . .

"It's a real steal with these monkeys thrown in—we could use them for next year's council."

that I am French, let me assure him that I am a white Anglo-Saxon Protestant from Orange Ontario.

The English-speaking students in Quebec have placed themselves in the position of a minority in a French-speaking organization whose members are restricted almost exclusively to the Province of Quebec (by planning to join UGEQ).

I would ask the editor, "How else do you expect them to have any effect on the conduct of their affairs in Quebec?" UGEQ was formed in order to escape the influence of CUS on the behaviour of Quebec students. The Quebec government handles education in Quebec and it is a French government. Insofar as Quebec universities must deal with that government, they are compelled to follow its policies.

I would like to add that what makes the editor think that the interests of English-speaking Quebec students are not with the Province of Quebec? Even, to some extent, "restricted" to interest in Quebec. A week ago an eminent Jewish lawyer advised Montreal Jews to move forth to avoid speaking French as their lingua franca of commerce just as they accept French institutions in the political and cultural field. In this extent the same sentiment is apparent among other English-speaking Quebecers. The regionalism of English-speaking Canada is in many ways unfortunate, but it is still there and that exists. The English of Quebec just aren't the same as Albertans.

Second statement: "UGEQ's policies are extreme, to say the least. Member universities have voted to provide assistance for U.S. students fleeing from communistic military service in Vietnam. They also favor (sic) can't you squat?) without qualification, a bilingual Quebec. It has been proposed that UGEQ should close down with labor organizations, and that the organization eventually will give formal endorsement to the concept of separation."

As a McGill graduate, I can assure the editor that (sic) many policies that appear "extreme" at McGill are not regarded as extreme at McGill. Sir George Williams, for example, was a Monarchist. From

opposing UGEQ's policy regarding the U.S. draft, I can easily picture many McGill students kicking themselves in the rear for not doing so.

As far as favoring a bilingual Quebec is concerned, the editor should give evidence of a bilingual Alberto before he complains on that subject. I would like to add that if Quebec, you couldn't even run Quebec if you didn't speak English. Now the French have taken over its part of the game. English Quebec is in the first part of the game. The Editor doesn't.

As to separation, if UGEQ makes that part of its policy, and it hasn't, yet, the English could always go out and come back to CUS. Monarchs, who better way to prevent separation, than to live there, and try to do good?

English-Quebec students had every reason to believe UGEQ would be inward-looking as to demand they leave.

As early as 1960, une could sense this at the Université de Montréal. If they didn't expect at least the possibility of this, it served them right.

Finally, "When will French-Canadians of Quebec give English-Canadians the dialogue a chance needs so badly and we English-Canadians deserve so much?"

Last year the French-Canadians came from Quebec and spoke to staff and students of U of A in English for a whole week. Perhaps the editor would like to do a repeat. The editor could do a repeat. Laval and Laval and speak to their students in French all week. That's the only way to get a dialogue, and English-Canadians better face the facts. And, curious as I am about that kind of approach, it's fair.

Bell Canada

The junior varsity Cubs out-scored the Nurses 55-23 in ladies' basketball Tuesday.

Poor shooting coupled with 23 fouls plagued the Nurses throughout the game.

The Cubs were better shot connecting with the basket on almost every foul. They took the lead and it steadily increased as the game progressed.

Nurses, with 9 fouls to the Cubs 14, didn't score until the late minute of the first quarter. Then Lynne Dunphy got two consecutive baskets to leave the score 11-4.

The pace quickened in the second quarter with the Nurses cornering the ball in the Cub end. However, the Nurses shot poorly and were out-scored 13-3.

Play evened out in the third quarter with both teams showing consistency. Don Sheldon, Nurses coach, was given two technical fouls for telling the referee to "call a few jump balls" as the Cubs pressed.

The fourth quarter was faster as the Nurses hit 10 baskets to the Cubs 15, their biggest gain in the game. Two Nurses were disqualified on foul.

Scoring was high — Cubs 10, Nurses 23 — but neither team scored many free shots. The Nurses lost only ten points this way. The Nurses fell down in their handling of the ball, losing 40-13.

Connie Raboud and Cathy McLeod led the Cubs scoring with 14 and 11 points respectively.

Lynne Sundby was one of the game's outstanding players. She managed to get 10 of the Nurses 23 points.

Curling semi-finals were held Monday after double elimination play last week.

Semi-finalists were picked from the teams which won their second game in regular play.

Results are: lower res 1 vs Delta Community, res 2 vs Galt, lower res 2-3-6; lower res 1 vs rehab med-4-1; nu 2 vs pharma-4-3; nu 1 vs rehab med-5-6; house ec 1 vs

Pl. Phi-2-1; upper res vs ed 2-10; ed 4 vs house ec 2-3.

Come out for mixed badminton Saturday afternoon.

The games are supervised by UAB and WAA, gets underway at 1 p.m. in the West Gym of the phys ed building.

Novelty prizes will be given to top couples.

Panda A beat the Cubs 35-14 in the Ladies basketball league last week.

Scoring was close in the first three quarters; Cubs were never more than 6 points behind. The last quarter made the difference when the Cubs scored only two points to the Panda's 16.

High scorer for the Pandas was Cathy Raboud with 14 points; for the Cubs, Margaret Convey with 14 points.

In the second game the Jaspers came out on top of the Panda B team 26-22. The Pandas started slow in the first quarter, scoring only three points. A spurt in the last two quarters placed them only 6 points behind.

Ron McElroy and Donna Bryka topped the Panda scoring with 8 and 7 points respectively.

The first broomball games were run off Tuesday.

Results were: rehab med and arts and sciences vs Alpha Gamma Delta 6-6; house ec 1 vs LDS-6-6; Newman Club vs lower res 1-0; Newman Club vs LDS-1-0. Three games were defaulted.

Loans granted to U of A and SU to cover SUB costs

The U of A will be granted a \$2,237,867 loan by the Alberta government to help pay for its share of the new students' union building.

The students' union's share of the cost, \$3,825,000, will be guaranteed by the Alberta government at 5½ per cent interest to be repaid over a 31-year period.

The new building will include:

- students' union general offices and facilities, meeting rooms, lounges, art gallery, music listening, browsing room, meditation area, multi-purpose room, etc.
- union operating areas — games area, information desk, crafts

area, barbershop, bank, guest rooms, etc.

• university areas — food services, bookstore, National Employment Service, alumni and counselling office, etc.

The title to the new building will rest with the U of A Board of Governors.

When the building is open the students' union will be responsible for supervision, security, general building hours and establishing general operating policies.

The students' union is also responsible for all sales outside of the bookstore and food services.

FEATURING

**Josh White Jr.
on tour from New York**

Reservations—488-1403 Evenings

The University Athletic Board collects \$7.50 from every full-time undergraduate student each year in the name of money.

What do you get out of it?

You get nothing out of it if you do not participate in any of the athletic clubs or do not play in the intramurals and do not participate in the Bear games.

If you are one of the many who fall into this category do you have the right to demand your money back? No you do not!

The athletic program on campus is designed to give students the opportunity to stay healthy while they get an education. If they fail to use the program it is their own fault and not the fault of anyone else.

A sound mind in a sound body.

It's an old expression but a true one. The student who vegetates all September to May usually fails to reach his potential. He is tired, fatigued, run down and in desperate need of Geritol. At least the stupid ones who exercise feel good when they flunk out. Most of them don't flunk.

If you run out of ink with
the new Scripto Wordmaster,[®]
it's your own fault.

See!

We've done everything we can to prevent such a thing. Inside this Wordmaster, with its newly-designed chrome cap, there's an exclusive Telegauge refil. It lets you see when you'll need another refil... long before you'll need it! And its tungsten carbide ball never skips. Never clogs. Price? Just \$1.29 with new chrome cap. Not bad for a ball pen that you'll never run dry with! That's the long-writing Scripto Wordmaster.
"Scripto Telegauge refills are available everywhere at only 59¢."

Campbell

The intramural program on campus is one of the best ways to keep fit. Every sport is in it, competition is keen, and games are geared to put participants on their own level of ability.

And if you have your profs you can always take it out on some poor slob in a water polo game or whatever.

You seem to forget the boring amoeba who puts you to sleep in psychology 234 as you drool over your grade.

Another thing you shouldn't forget is you can't win a Rhodes Scholarship and keep it unless you're happy unless you participate in at least one sport.

Some of the best Rhodes Scholars I know fulfilled this requirement running the liquor out of their blood on Sunday morning as they warmed up for the intra-

. . . looks at sports

musical cross-country.

It's amazing the way people do things on this campus.

Then there are the other athletic clubs on campus. The judo club for 97-pounds and up, the rifle club for budding student engineers, the tennis club for those who like clubs built for students, and there are enough people on campus to make every one of them a success, but every year clubs fall off in lack of interest. You are wasting your own money if you don't participate directly in athletics.

Then there is the matter of the intervarsity. There is a lot of my money that should be done away with—they spend a lot of money. But let's not be too hasty. If you played on one of the teams I'm sure you wouldn't want to see the

whole thing break down just when things are starting to roll.

The teams on this campus rank among the best in the nation. The games are exciting to watch. The football games is one of the few places I can think of outside of The Gateway office where I can swear in public.

Now that you can do at a football game besides watching the team are too obvious so I won't list them in this column. The engineers can get their education the best way possible. The football games are the Bears were worth watching every minute this year—they were a stand-out ball club.

It is a shame to watch these fellows beat their brains out every Saturday when nobody gives a damn whether they win or lose.

Half the people on this campus didn't even know where they were going to Toronto.

College sport is one of the great unifiers on a large campus like U of A. Get your money's worth—participate.

Season's crucial series

Hockey Bears meet Bisons

The University of Manitoba Bisons meet the Golden Bear Hockey team in what could be the crucial series of the season this year.

The Bisons were top of the league last year. But it was a race to the wire which saw the Bears second slot at the end of the year.

The Bears split games with the Bisons last year 2-2. The Bears won both their home games 5-4. One of the losses came in overtime and the other came out of the fire when the Bears potted 2 in the last minute of play.

The two tilts this weekend are crucial since the outcome may decide Canada's representatives at the Winter Universiade in Turin next February. The Bisons went on to win the national championship last year and are the selection committee's logical choice if they maintain a good record in league play. If they lose, the Bears it is another matter altogether.

Both teams are undefeated in league play this year with the Bisons leading the University of Saskatchewan Huskies 7-6 and 6-4 and the Bisons downing the Dinos 9-2 and 16-4.

The Bisons aren't invincible—they lost to Canada's National Hockey Team 13-2 in an exhibition game Nov. 18. But don't get the idea they are pushovers. They are not.

They hit the ice with a tough team this year. There is Jim Irving, the legend for the helms, Bear coach Clark Davis, the helms amateur in Canada. He has several pro offers and skates as well as most major leaguers according to Drake.

Chuck Meighen, a 6'0" defenceman and team captain, is another top-notch Bison ice. The 21-year-old Meighen is the son of the Brandon Wheat Kings of the Manitoba Junior Hockey League, and is in his third year with U of M. George Butterworth rounds out

Bears this year but he is needed for a first class season. He comes to the Bears from the University of New Brunswick. Michel David is the 21-year-old All-Canadian all-star who was a team-mate of Leblanc weighs in at 165 lbs. but he cuts a wide swath on the ice.

From the University of Michigan the Bears picked up Wilf Martin. The 23-year-old has pushed the point past nearly every goalie he has met and shows no signs of slowing down.

Austin Smith is another new tough-guy with the Bears this year. Smith scored two goals in the weekend's game against the UBC Thunderbirds.

"The tests are quite evenly matched. Our defense is very good and if our goaltending stands up we've got a good chance of beating them," said coach Drake.

Faculties may have to pay free passage to the week's game so seats in the arena will be limited.

Game time is 8:00 p.m. on Saturday.

Representatives from our Firm will be on campus Tuesday and Wednesday, December 14th and 15th, 1965, to interview students for positions available in offices of our Firm throughout Canada. These positions are available for the graduates in the Faculties of Business Administration and Commerce, Arts and Science, Engineering, and Law.

Further information and arrangements for interviews are available through the Placement Office.

Canadian University Press DATELINE

UAC students sniffed out

CALGARY—Two students, charged in the men's residence, received severe reprimands from the Student Disciplinary Committee Nov. 2.

Although the students were not caught with liquor, Paul Adams, dean of men, said there was a distinct odor of liquor in their room.

If they had been caught with liquor, they would have been "booted out of university," he said.

The students appear to be taking "strong steps" on their own and are not letting "the boom" on those breaking University rules, Mr. Adams said.

He said UAC does not intend to go as far in such matters as does the Edmonton administration.

We would rather let students handle all minor disciplinary problem themselves and let us deal with the major ones.

CUS to test birth control law

VANCOUVER—The Canadian Union of Students plans to test Canada's birth control laws.

Test cases on the ban on sale of contraceptives were discussed at the western regional CUS conference Nov. 12-13 in Calgary.

CU's local CUS chairman said 50 druggists in Vancouver and Victoria are to be approached by 50 single girls and ask for contraceptives.

CUS will have asked the druggists before hand to agree to the scheme.

"If there is any prosecution, they will serve as at test case for the contraceptive law," said Ed Lavelle, the CUS representative at UBC.

Lavelle said the enactment date for the testing program would not be announced.

Police catch false ID users

LONDON—City police inspector Leonard Elgie warned students here not to go boozing with someone else's birth certificate.

Police are cracking down on students who lend or borrow certificates for drinking, or buy drinks for someone under 21, Insp. Elgie said Nov. 18.

In the last few weeks 14 students from the University of Western Ontario have been charged—half for supplying certificates and half for using false age, he said.

One student, under 21, was caught carrying a case of beer from a Brewer's Retailer. Other offenders were men charged with supplying under-age dates with certificates.

Two male students were found drinking in a bar. A police check revealed one student had loaned his birth certificate to the youth beside him.

The 18 Western students are being summoned to court. Although they spent the night in jail, Insp. Elgie said police had the right to lock them up.

Students obtaining liquor under false pretences are charged under the Liquor Control Act. Students supplying the certificates can be charged under the LCA or the conspiracy section of the Criminal Code.

The maximum penalty for supplying is \$100 and 30 days. First offenders for under-age drinking are usually fined \$25 or five days.

McMaster may leave CUS

HAMILTON—Student government officials at McMaster University have threatened to withdraw the university from the Canadian Union of Students.

A notice of motion proposing McMaster withdraw from both CUS and the Ontario Region of CUS was given at a student assembly meeting Nov. 24.

Brampton student union vice-president, said the motion was designed to "scare" students into action regarding CUS. McMaster boycotted the annual ORCUS meeting at Queen's University Nov. 20—the only Ontario campus to do so.

At the time, Larry Bear, McMaster student union president, said ORCUS had "Bungled all its jobs in the province."

Unconstitutional hiring at UBC

VANCOUVER—The UBC student court has declared unconstitutional the council policy of hiring council officials to do council work in summer.

The seven member student court brought down the 6-1 ruling after two hours of deliberation.

Five UBC student executives have been hired during the last two summers at \$400 a month each.

The student court ruled the executives did not have to repay their earnings although B.C. corporations regulations required it.

First year law student Mike Coleman, the student who requested the hearing, said: "It's a victory for ethics in government. Student leadership is unaware of ethics."

Coleman pointed out the councillors voted themselves the salaries with only ten interested parties present.

Future councillors will have to be made aware of the court decision so they cannot be railroaded into future unethical resolutions," he said.

Youthful homosexual experiments don't make perverts says panel

By PETER ENNS

When little Johnny and George experiment with homosexuality, this does not mean they will grow up to be perverts, a panel agreed Tuesday.

The panel on homosexuality sponsored by the Student Christian

Movement, was held in the games room at Lister hall.

Panel members were Rev. Stan Erratt, United Church Chaplain; George McLelland, social worker; Dr. Harold Barker, child psychiatrist; and Tom Harding, student.

The cause of this perversion is unknown, but it is a maturation process that happens to all of us at an early age.

"I believe all of us reach in our maturation process when we have homosexual or lesbian tendencies," said social worker George McLelland.

Some people get stalled at this stage of growing up, he said.

Such tendencies among young people are no more homosexual than relationships between a little boy and girl are heterosexual, said McLelland.

It is believed that homosexuality is latent in all of us to a certain degree, but that such tendencies are greater in some people than others, the panel agreed.

These tendencies may be caused by such things as biological makeup or sociological background.

Technically a homosexual is a male and a lesbian is a female.

He or she is a person who gets sexual attraction from someone of his or her own sex; this gratification is not necessarily physical.

Dr. Kinsey does not think that their are more homosexuals than lesbians.

There appear to be more homosexuals in our society because lesbianism can be more readily

camouflaged by the acceptable behavior of women in our society," said Dr. Barker.

The panel said homosexuality is not a mental illness, rather it is personal problem.

Whether or not it is normal depends upon how we look at it and consider some cultures it can be considered non-deviant, Mr. McLelland said.

A United Church chaplain, Rev. Stan Erratt, said that there may be many fine things about a homosexual or lesbian relationship, but since it is part bad, it is not right.

It is not a natural thing and people will therefore say it is not normal or good, he said.

Homosexuality affects one's conscience and leads other people into the perversion; therefore it is bad, he said.

"Homosexuality should be accepted by society because individuals are being driven into a corner with nowhere to turn," said Mr. McLelland.

Mr. Erratt said that the perversion should be accepted by society, but it should be accepted like cancer.

"Society should help find a cure for the perversion, but should not hit it to the point of condoning it," he said.

Homosexuality is illegal, and until recently, certain types of homosexual expression carried higher penalties than others, Dr. Barker said.

All panel members decided that homosexuality should be legalized.
